Frank, Rimerman + Co. LLP
certified public accountants

Frank Rimerman + Co., LLP chooses Net3 for Cloud Migration, Data Protection in the Cloud.

ABOUT FRANK RIMERMAN+CO., LLP

Frank, Rimerman + Co. LLP (FR+C) provides a dynamic range of financial services to individuals and businesses in a wide range of industries to achieve their personal or strategic financial goals. Headquartered in the greater San Francisco Bay Area, they bring the same dedication and personal service to all clients on the West Coast, East Coast and everywhere in between.

THE CHALLENGE

When Net3 started discussions with FR+C, they were looking for cloud solution while they moved from one location to another. FR+C wanted to fail into to Net3's PvDC cloud and briefly operate in the cloud while they phsycially moved their servers to another location. After the move was to be complete, their data would fail back on premise in the new location.

THE EXECUTION

FR+C replicated 59 VMs and 32TB of data to Net3's cloud utilizing Zerto, for real time replication and an instantaneous failover. FR+C successfully operated in the cloud during their move without any disruptions to their business. Upon finishing the project, Net3 also conducted the data migration to backup to their new production site, all while continuing to replicate their data for a continued Backup/Disaster Recovery solution.

Industry
Financial Services

Environment
59 VMs
32 TBs
VMware
HyperV
Virtual machines

Challenges
Needed a colocation for their data operations while they move locations.

Product/Solution
Zerto for Data Replication and instant failover
Net3 Cloud for day to day operations
Net3 Cloud Migration services

ABOUT NET3

Net3 is a leading Nationwide Cloud Services Provider. We own and operate a private cloud, Net3 Cloud, with both East and West Coast locations. Net3's private offerings include IaaS, Cloud Backup, Disaster Recovery, Cybersecurity, and Cloud Managed Data Protection Services, ensuring we can meet our clients' diverse needs.

For elite customer service, every client has a dedicated team of Net3 Cloud Engineers. From training and onboarding through the length of your contract, we work with each client to build a true business partnership and ensure cloud confidence.
