

Increase efficiency and reduce costs by leveraging private cloud.

Net3 Technology Infrastructure-as-a-Service (IaaS)

PvDC is Net3's private cloud, built for simplicity without sacrificing reliability. Maintain full control of your systems—complete with backups and redundancies—and adjust and reconfigure resource allocations at any time.

Benefits of IaaS with Net3:

- ✓ Simplify or eliminate expensive infrastructure
- ✓ Improve your system's safety, security, and performance
- ✓ Cost Effective - no data lock-in and no ingress/egress charges
- ✓ U.S.-based customer support with rapid response times

Choose where your data resides, East Coast or West Coast U.S. data center locations, customize the size and configuration of your environment, and consume your resources without data lock-in.

Key PvDC Features:

- Self-managed DHCP, NAT, and firewall services
- Load balancing options available for high traffic servers.
- OpenStack-compatible APIs to enable infrastructure as code and reporting access.
- Built-in high availability and fault tolerance.
- 24/7/365 support from Net3 Cloud Engineers.
- Multi-site capability; run your workloads in our geographically diverse data centers.
- Secure multi-tenant environment that offers enterprise-level network connectivity.

Get Cloud Confident.
